

# KEGG\_2021\_Human

Enriched terms

Protein processing in endoplasmic reticu...  
 Spliceosome  
 Endocytosis  
 RNA transport  
 mRNA surveillance pathway  
 N-Glycan biosynthesis  
 Epstein-Barr virus infection  
 Nucleotide excision repair  
 Amyotrophic lateral sclerosis  
 Citrate cycle (TCA cycle)  
 Various types of N-glycan biosynthesis  
 RNA degradation  
 Salmonella infection  
 Th17 cell differentiation  
 Terpenoid backbone biosynthesis  
 Protein export  
 Parkinson disease  
 Shigellosis  
 Vibrio cholerae infection  
 Basal transcription factors
